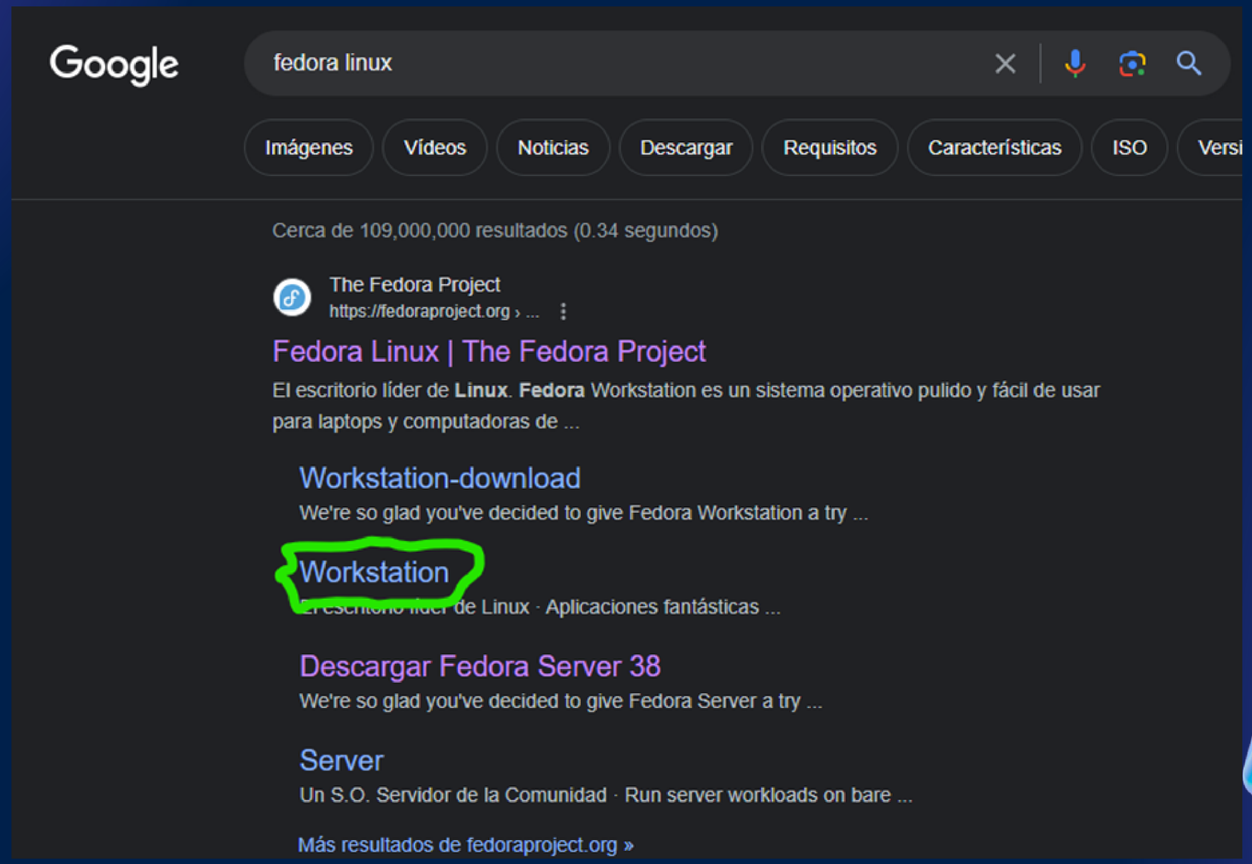
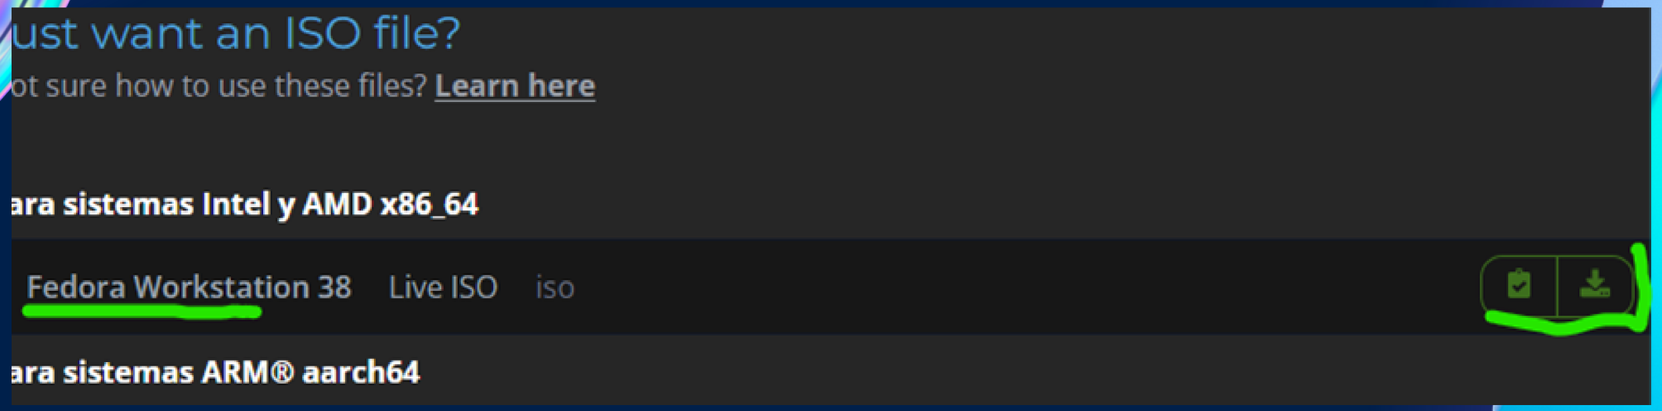
Installation Manual of Fedora

By TECNOLOGY SOLUTION

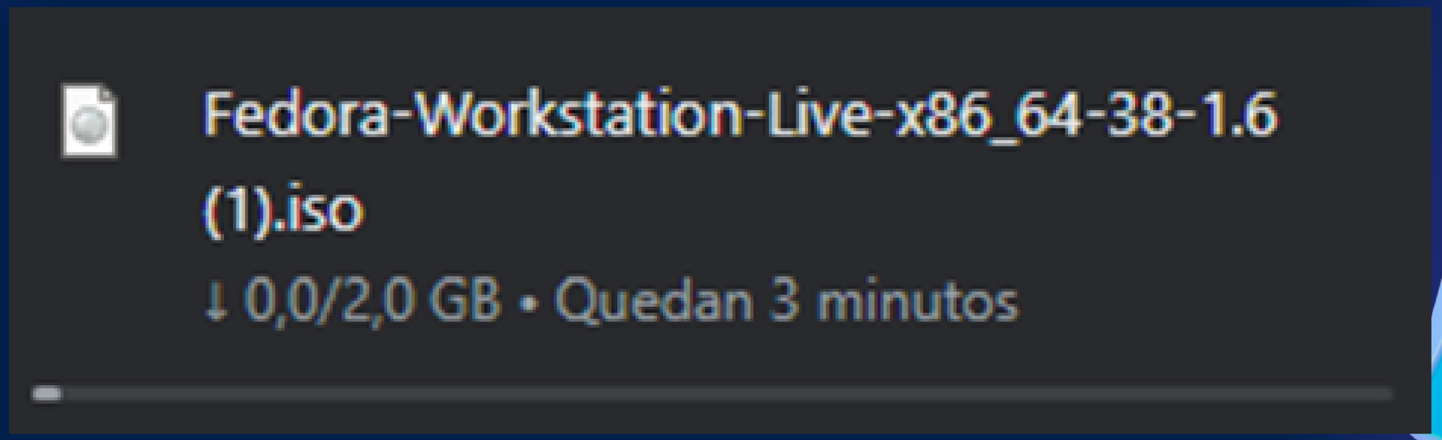


-We search in the engine search “Fedora” and choose the “Workstation” option

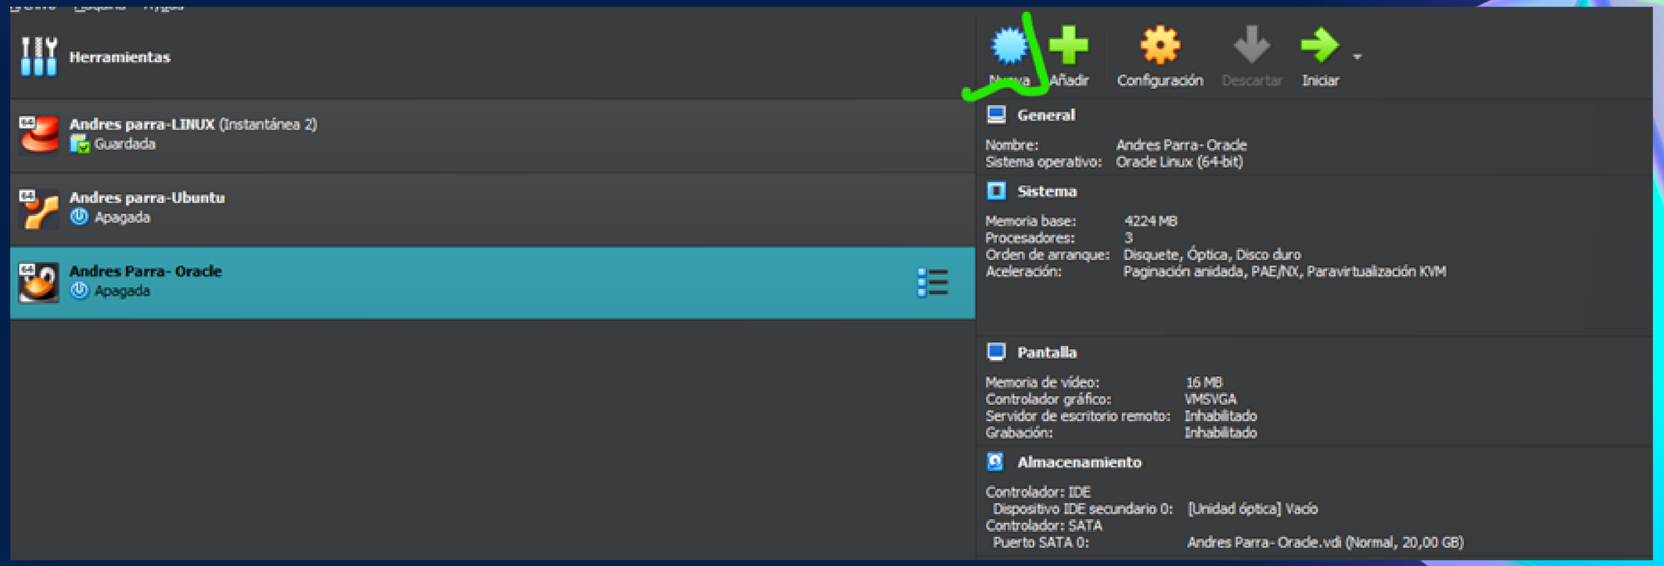
- WE CLICK ON THE BUTTON “DESCARGAR AHORA”



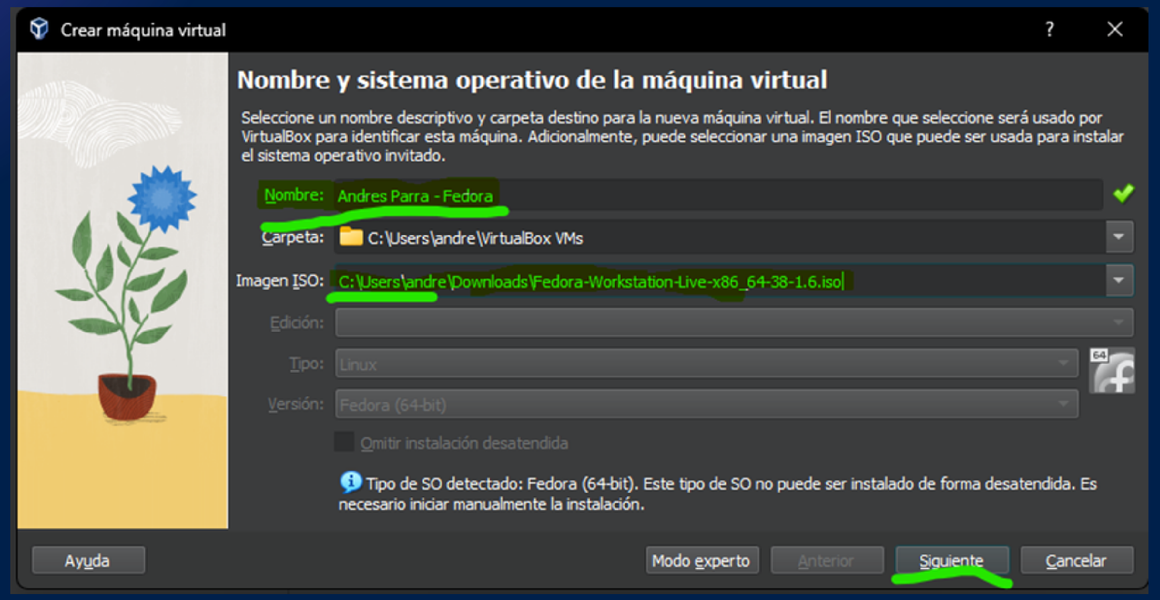
We select the “ISO” file and download it



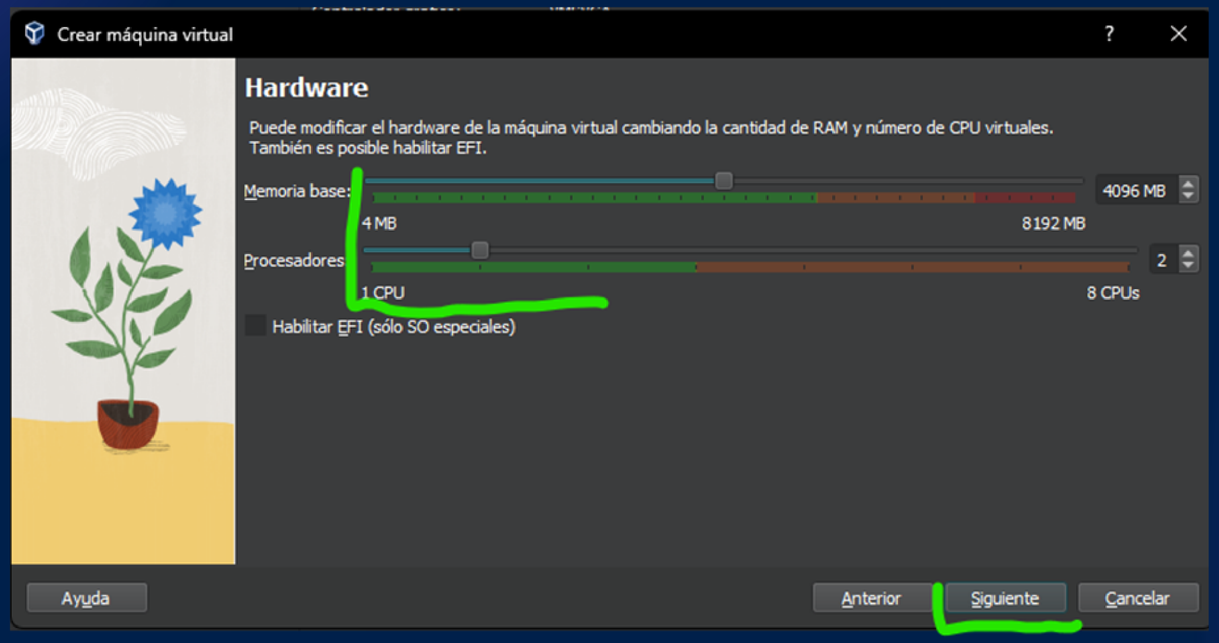
Be patient for the download



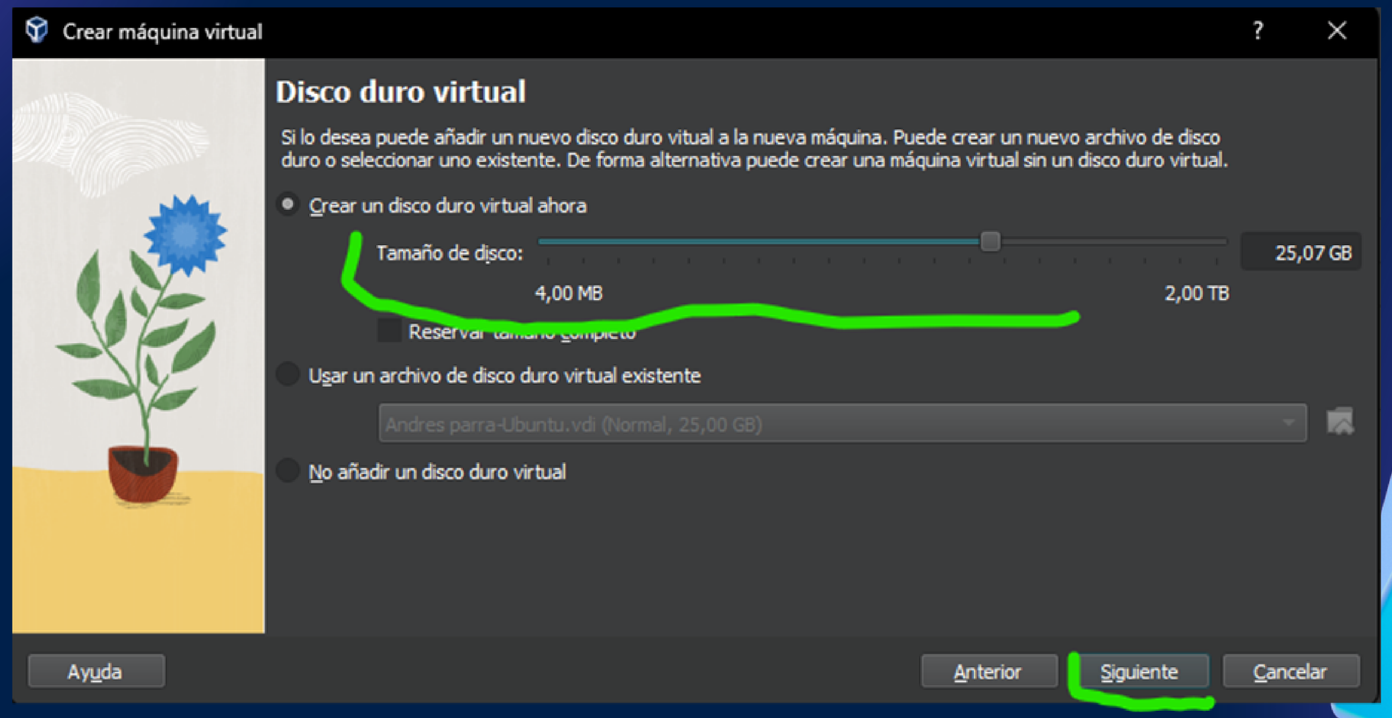
Now, We enter In Virtual Box and click on “Nueva”



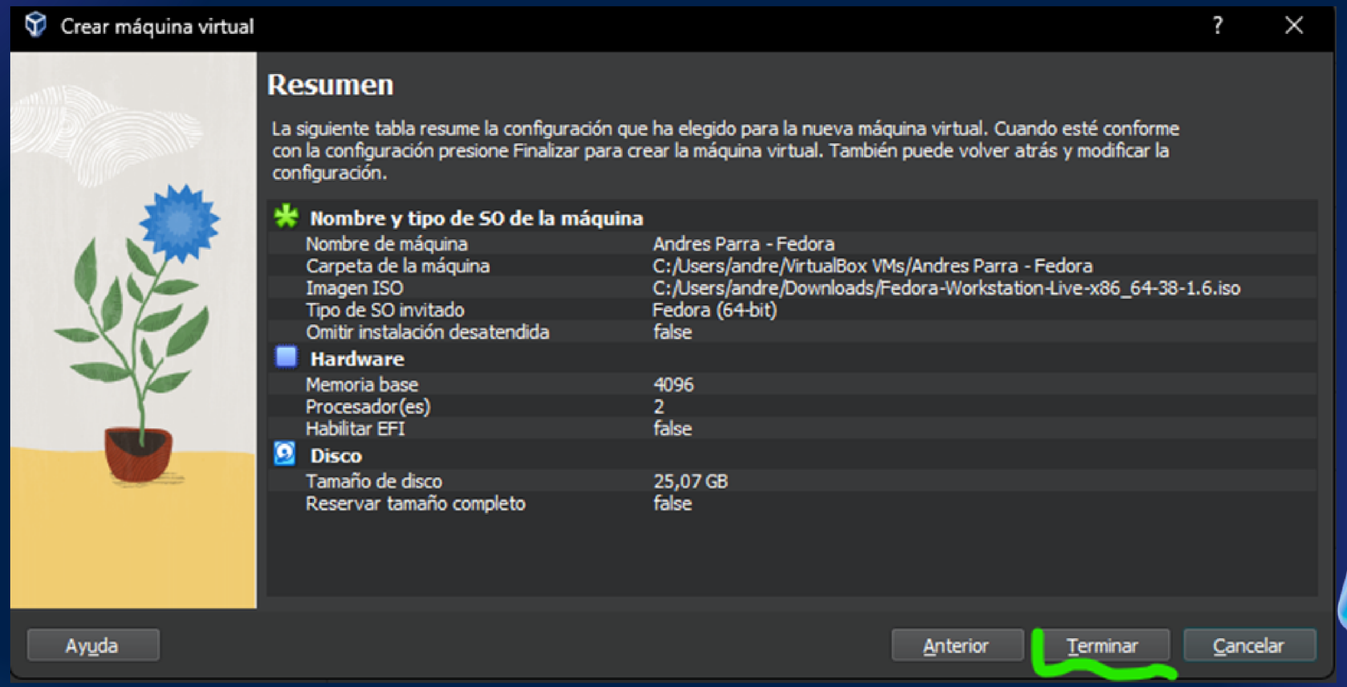
-Register a name and add the file ISO that we had downloaded



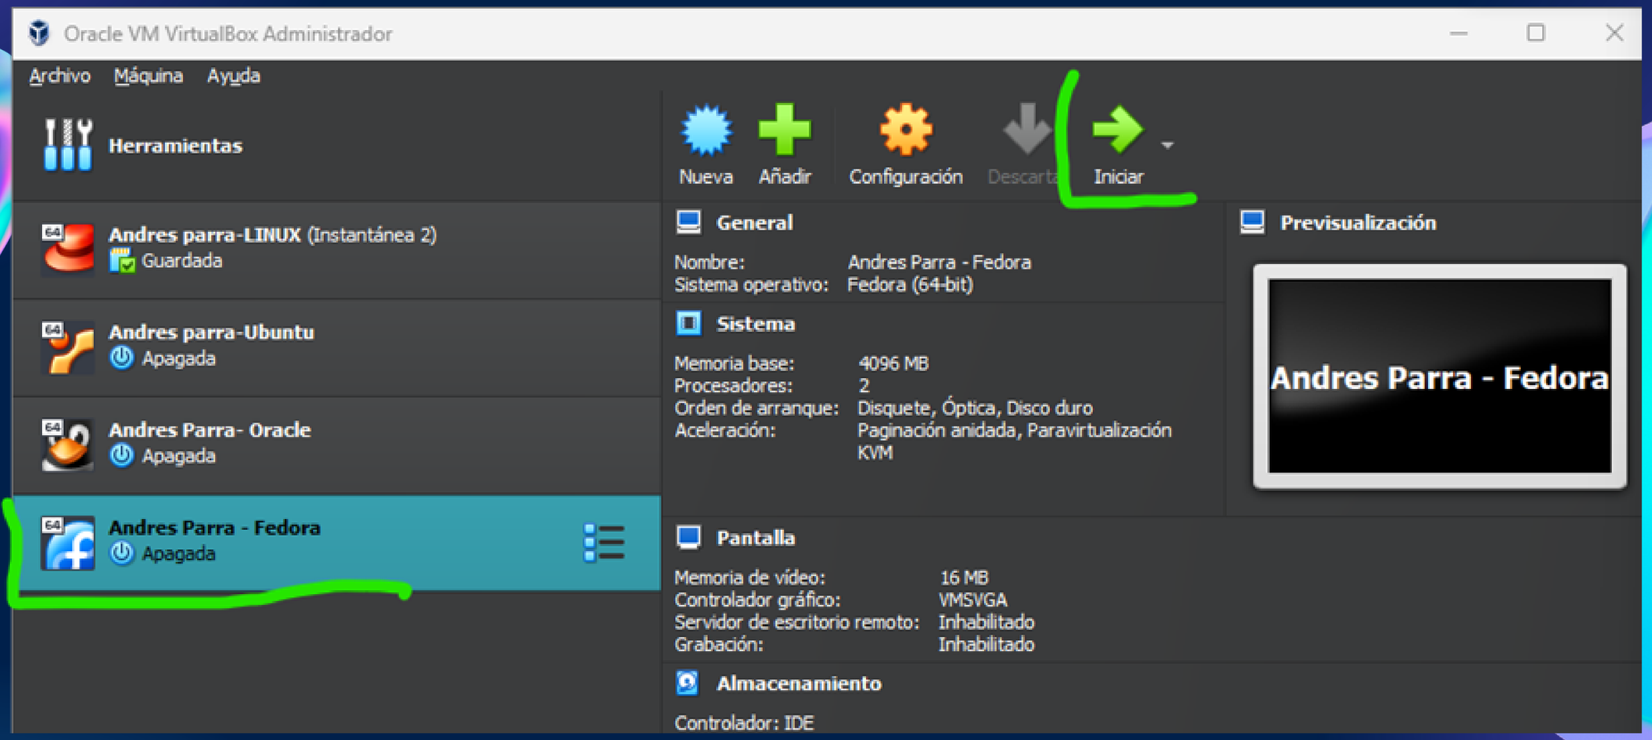
-Modified the base memory and the processor that you need



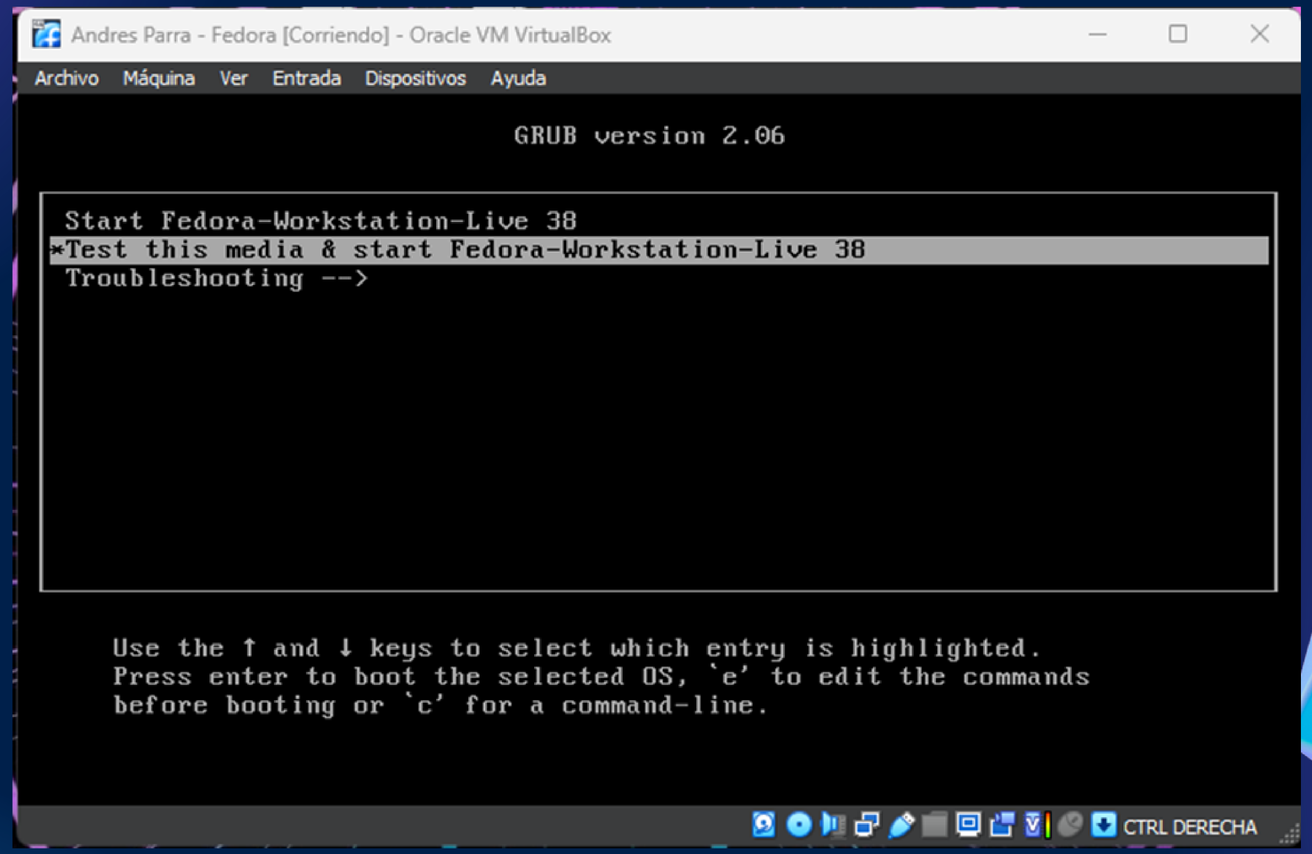
-We create our virtual hard disk and click on “siguiente”



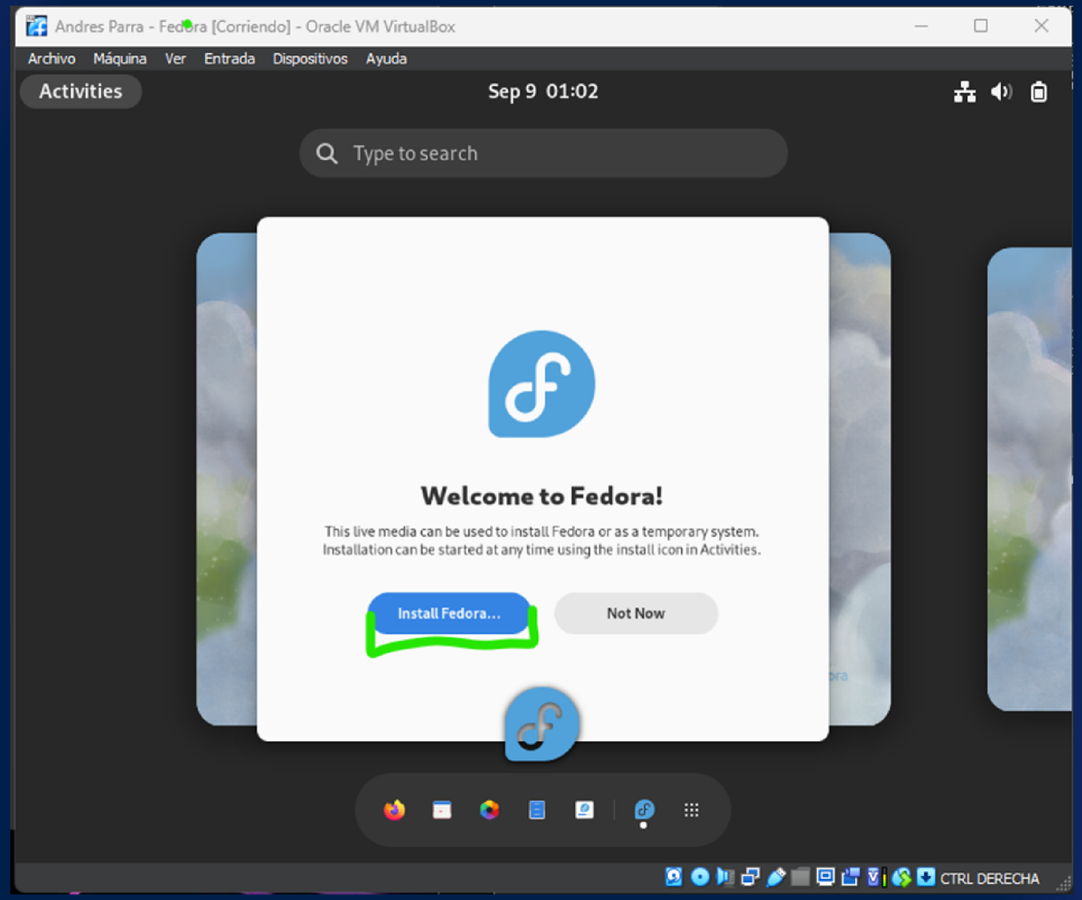
-Click on “terminar”



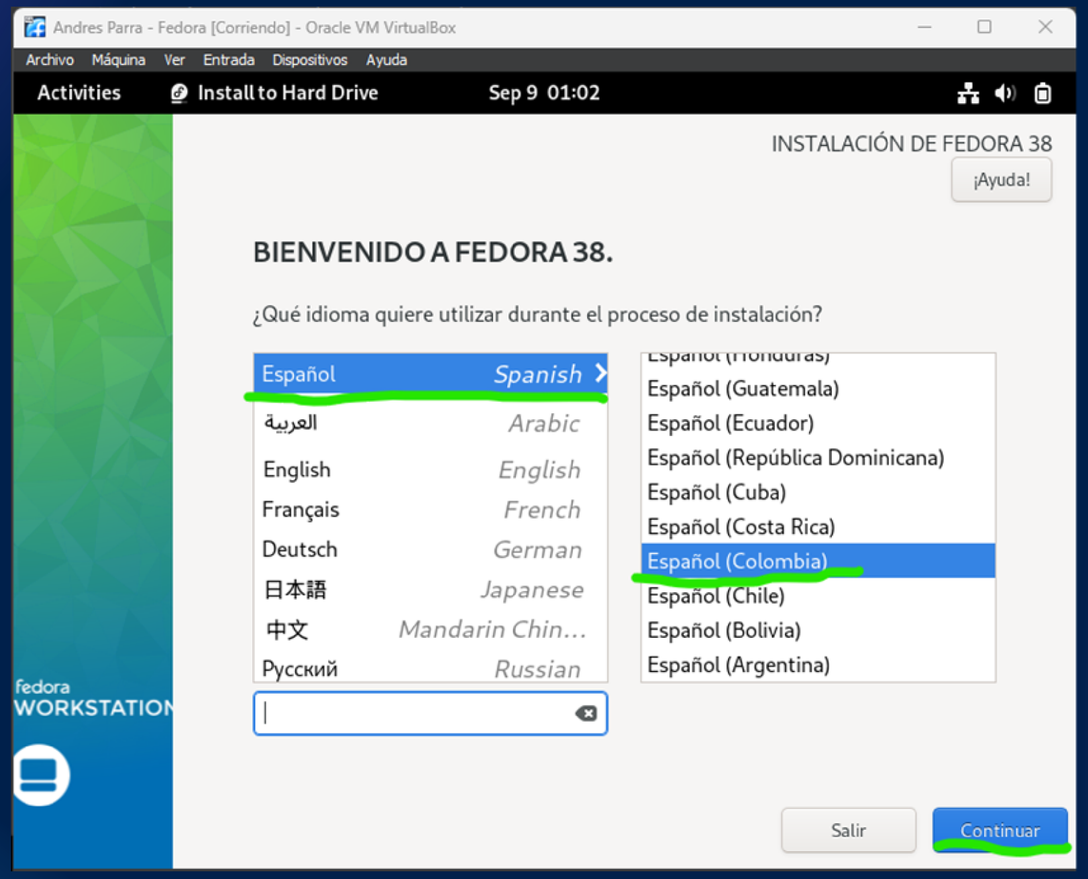
-Select the appropiate operative system.



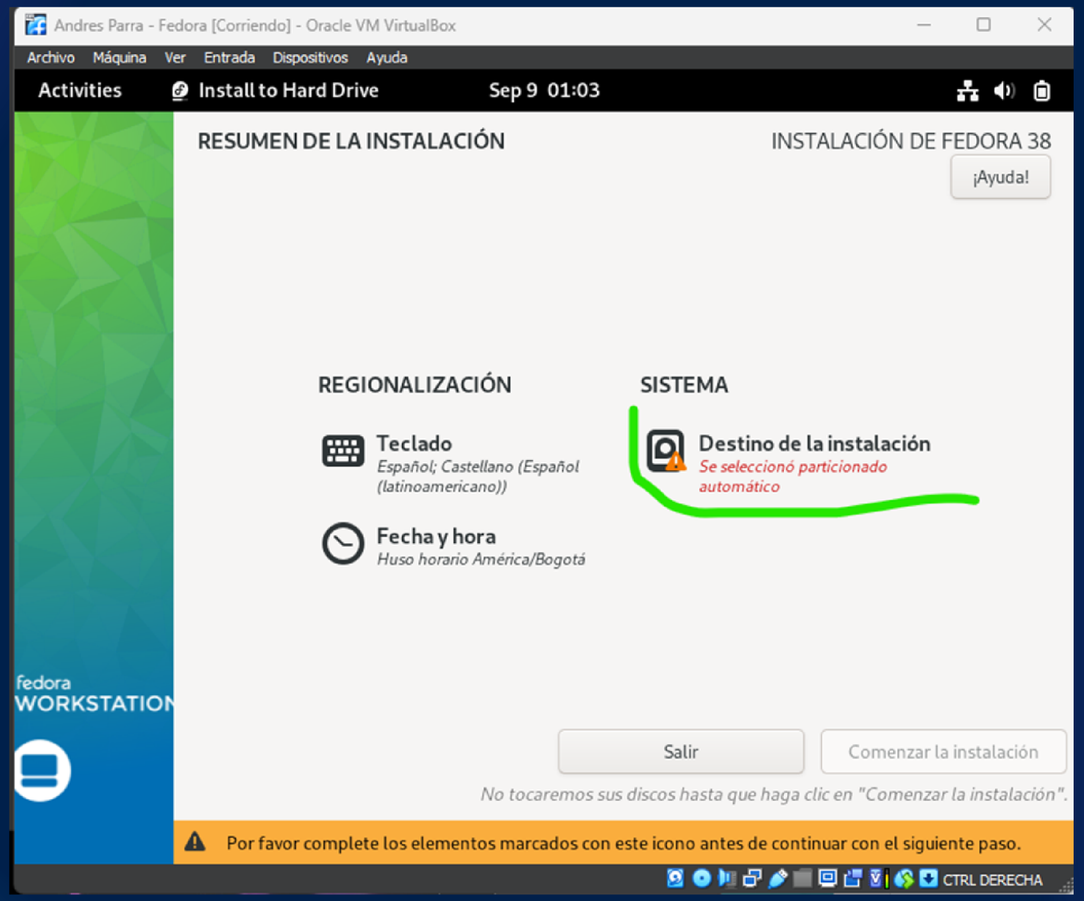
-In the keyboard press “Enter” for test and continue the installlation



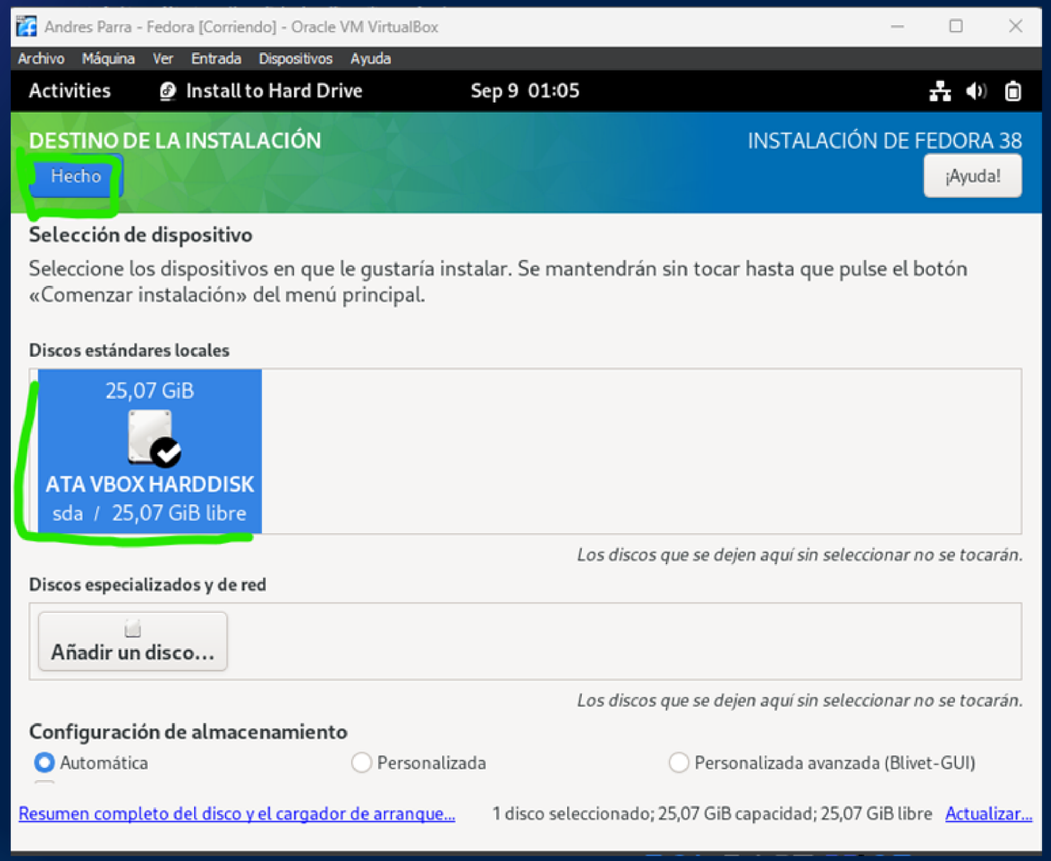
-After that finish the test, we click on the button “install fedora”



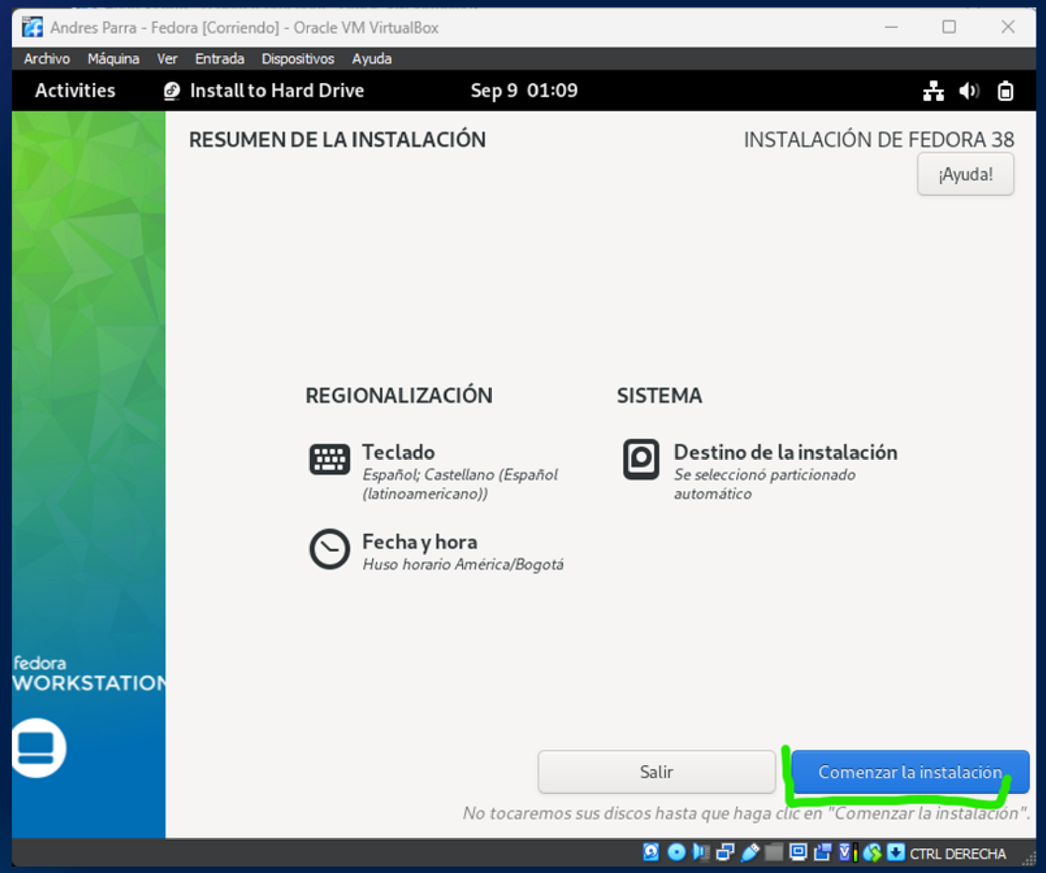
-Choose your prefer lenguage and click on “continuar“



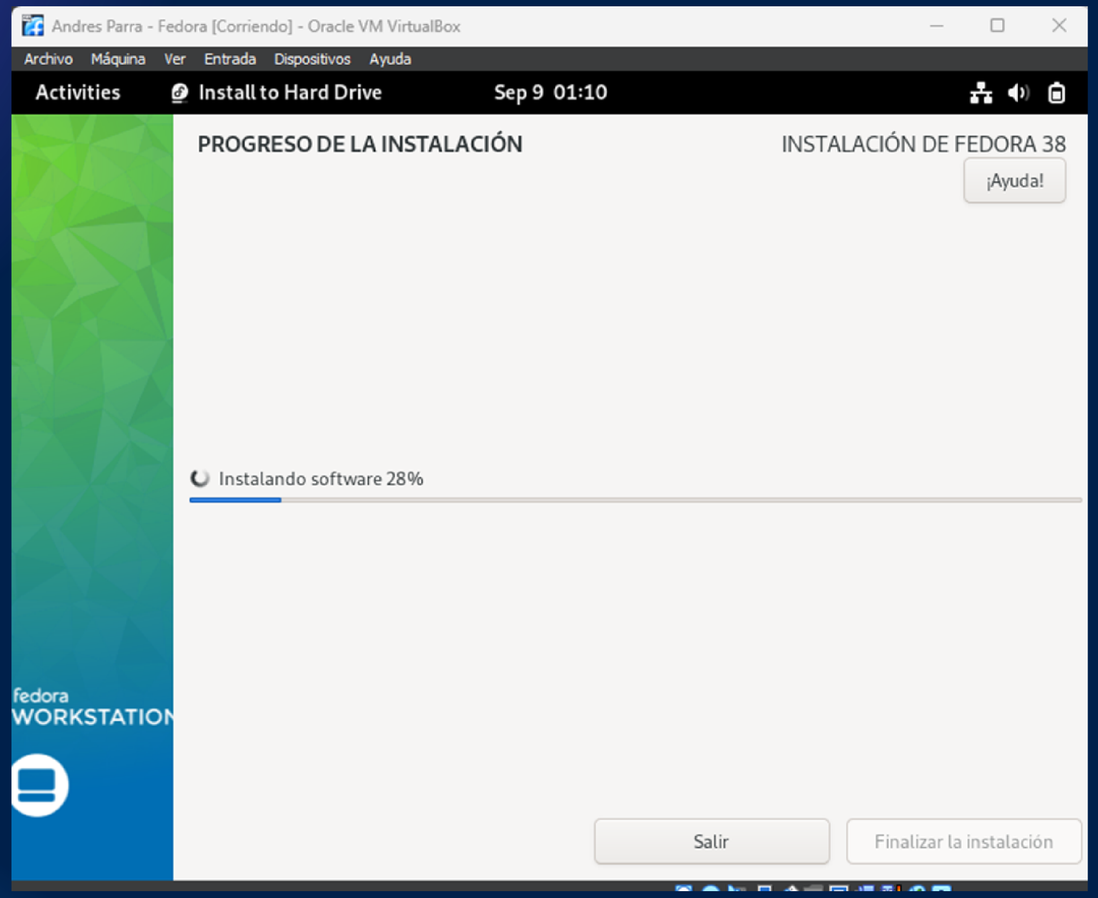
-Select on “Destino de instalacion”



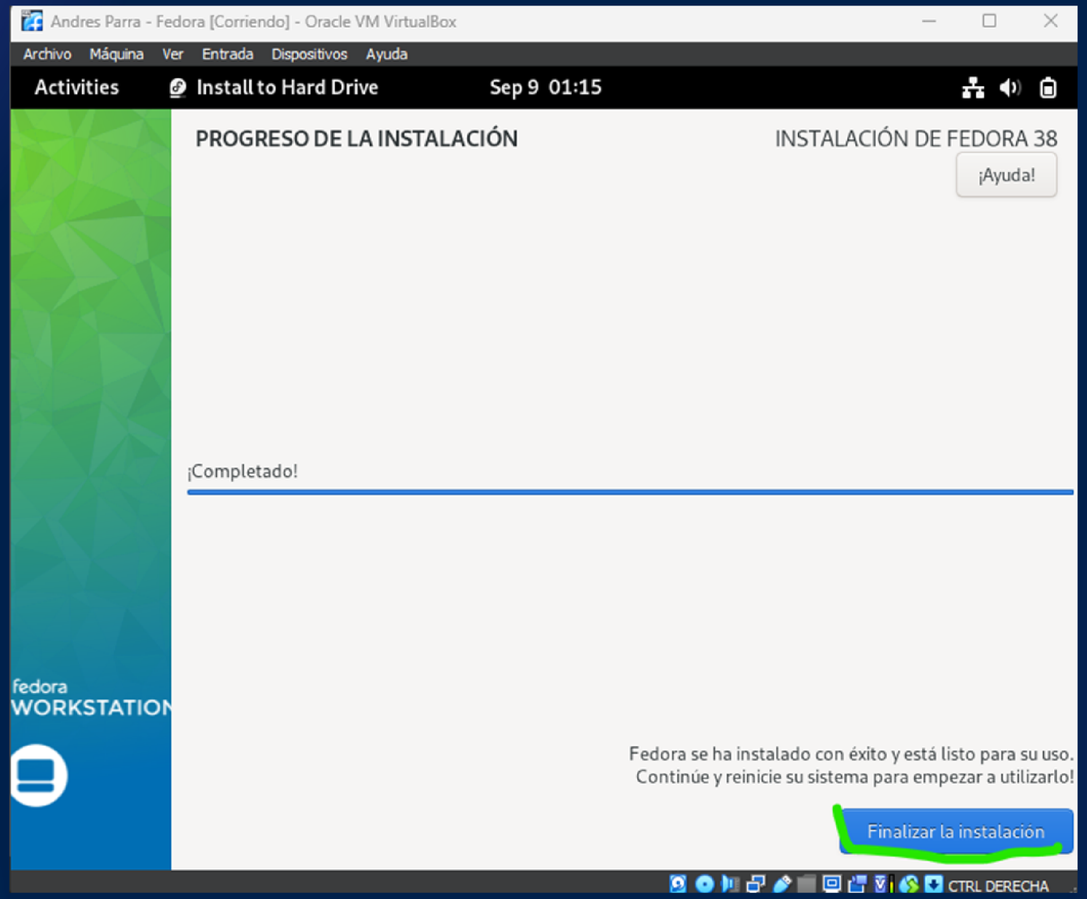
- Select the local disk and click on “hecho“



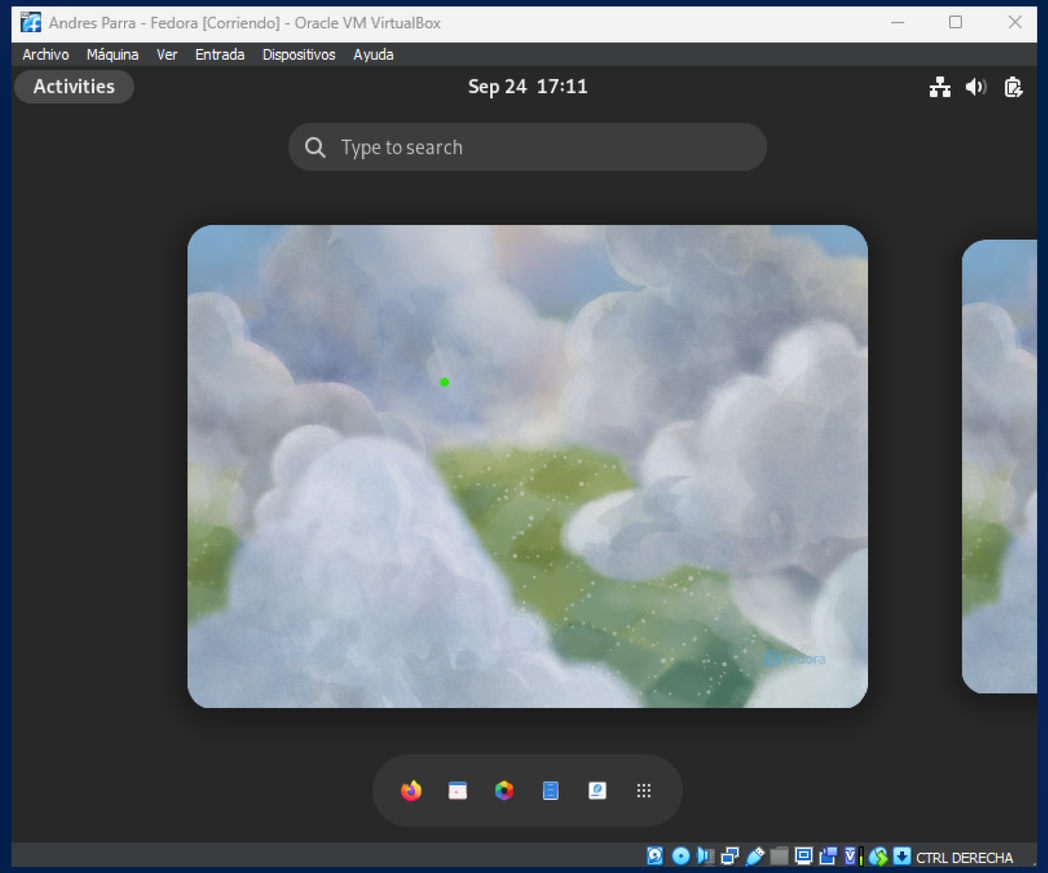
- Now click on “comenzar instalacion“



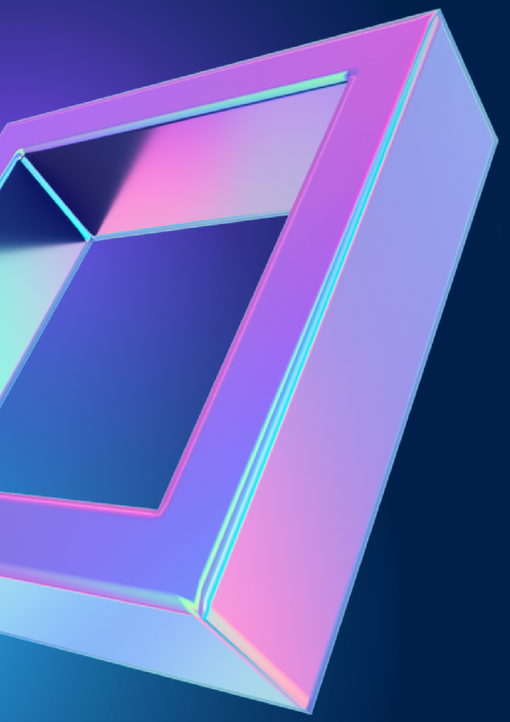
-Wait the installation



- When finish the installation click on “finalizar la instalacion“



-Success, Finished the Operative System



Thank you for watch
